- ENTITY FRAMEWORK
- REACT

Soft Skill

- Quick Learner
- Passionate
- Communication
- Multi-tasking

Education Background

- **Gayatri Vidya Parishad College For Degree and PG Courses**
  Bachelor's Degree in MSCs
  Completed in 2022

- **Sri Gayatri Junior College**
  Completed Intermediate in MPC
  Completed in 2019

- **Vignan Sadhana English Medium School**
  Completed 10th CLass
  Completed in 2017

About Me

Hello, I'm Naveen Kumar, a skilled Full Stack Developer with 2 years of experience. My expertise lies in a range of technologies, including ASP.NET, .NET Core, .NET Core Web API, and .NET Core MVC. I am also proficient in front-end technologies such as React, HTML, CSS, and JavaScript. My passion for creating robust and user-friendly applications drives me to stay updated with the latest trends in web development. I'm certified in Azure Fundamentals (AZ-900) and Azure Developer Associate (AZ-204), demonstrating my expertise in cloud technologies.

Professional Experience

Capgemini Technology Services India ltd.

2022 – Present

Full Stack Developer:
- **Finops - A Azure Cost Management Application**
  I played a pivotal role in the FinOps project, where our objective was to optimize Azure service usage and reduce costs. I spearheaded the development of a crucial Azure Function using .NET Core Web API. This function interacted with the Azure Consumption API, retrieving usage details and storing them in a database. Additionally, I ensured seamless integration of this data into the UI, allowing users to access and analyze Azure service usage effectively. Our efforts in FinOps led to valuable cost-saving suggestions and optimization of Azure services.

- **Meijers - A Grocery and Retail Application**
  I expanded my skill set by actively participating in the Support Central project. I received training on a drag-and-drop UI tool, contributing to the creation of UI pages effortlessly. For our Meijer client, I applied this newfound knowledge to develop a demo for migrating their project from .NET to Support Central technology. In this role, I focused on creating Web APIs for storing and retrieving banner images, showcasing my versatility in both UI and backend development. This experience broadened my expertise in modern UI technologies and strengthened my capabilities in delivering innovative solutions.

- **Caesars - A Gaming and Hospitality Application**
  A dynamic gaming and hospitality venture built on .NET Core MVC, I have been extensively involved in UI and API integration, and testing. My responsibilities include ensuring seamless communication between the UI and API components, conducting thorough testing to guarantee a robust and user-friendly application, and actively contributing to API development. This project has provided me with a comprehensive understanding of the intricacies involved in gaming and hospitality systems, further enhancing my skills in both frontend and backend development.

Certifications

Completed Certification in Azure Cloud Computing
- AZ-900 (Azure Fundamental)
- AZ-204 (Azure Developer Associate)
